

# RAPIDLIFT

## INCREASING THE FLEXIBILITY OF A CULTIVATOR DRILL...

RapidLift is a hydraulically operated, low disturbance toolbar for fitting to an existing cultivator drill. Available in working widths from 3 to 8 metres, the RapidLift can increase the flexibility of a cultivator drill by adding soil loosening capable of working to a maximum depth of 300mm, yet with little or no inversion of soil layers. RapidLift is designed to compliment a cultivator drill, and has a strong chassis design to take the loading of legs working in the soil and without passing undue forces to the drill itself.

Particularly suited to making a cultivator drill a true one pass system suitable for oilseed rape and cereal establishment, the RapidLift has as standard a hydraulically raised and lowered toolbar meaning not only can low disturbance loosening be utilised whenever required, but can also be operated steplessly at varying depths whilst 'on the go' across the field. When coupled with the existing tools on a cultivator drill, makes for a very flexible system designed to create the ideal seedbed on the day.

### Standard features include

- 500mm leg spacing
- Shear bolt and hydraulic auto reset models available
- High grade steel used throughout
- 'Clip on' depth control
- Hydraulic quick release bulkhead couplings & 7 pin socket
- c/w slave wheels for delivery and fitting
- Choice of legs

Model	Work Width	Legs	Type	Min HP
RL300	3.0	6	Rigid	150
RL400F	4.0	8	Rigid	200
RL400	4.0	8	Telescopic	200
RL600	6.0	12	Hyd Folding	300
RL800	8.0	16	Hyd Folding	400

### Options

- Depth wheels (Option on RL600, standard on RL800)
- CAT 4 heavy duty swivel towing eye
- Metering wheel mounting kit
- Hydraulic Front disc assembly
- Wheel packer drawbar (for RL300, RL400 & RL600)
- Variable Depth Control
- SOYL Auto Depth System available for continuously variable depth control from pre-determined treatment plan
- Tyre packer (custom build machines only)
- Electro Hydraulic Diverter Valve (to double up an existing hydraulic service)
- Wing Accumulator Float kit (RL800 only)
- Tillso Sabre Ultra Lite leg option
- Adaptor plate kit to suit non Vaderstad drills
- Quick change over drawbar system for Vaderstad Rapid drills – including standard drawbar for drill only
